

CSC490 Design Project Proposal

Lily Friedberg

Oscar Suen

November 6, 2015

1 Working Title

Jeopardy

2 Description

Jeopardy is a game show where contestants answer trivia questions. Using questions and answers from past Jeopardy episodes, we will build a virtual Jeopardy trainer. Different players can log on and compete for the highest score by answer Jeopardy questions. They can choose to replay a show, answer questions from a category, or just answer random questions. The database will keep track of all the questions as well as information about each player.

3 Timeline

By Nov. 8, we should have the database built and populated.

By Nov. 11, all necessary pages and files should exist.

By Nov. 13, the program should talk to the database, the question box should be finished.

By Nov. 16, the project should be functional, with only aesthetic work and bug fixes left.

The Project is due Nov. 17.
